## 1. Add a Video

Once the user signs-in to the Studio, he will be landed on the Dashboard page. The user can add a video to Studio using the Upload tab. The user needs a Youtube video link to add a video to the studio. There are 2 ways to go to Upload page.

- i. Click Upload tab button on top right
- ii. Click Add video button on bottom of Dashboard page

The screenshot displays the iFlix Studio dashboard. At the top, the header includes the iFlix Studio logo, navigation icons (home, upload, refresh), and a 'Continue Editing' link. Below the header, there are three main sections: 'Continue Editing', 'Published', and 'Featured'. The 'Continue Editing' section shows a row of video thumbnails, including 'Upload Images In ReactJS', 'Filhaal 2', 'Superman vs Wonder Woman', 'Movie Clip HD', and '600 Million Views'. The 'Published' section shows thumbnails for 'Baarish', 'Chale Aana', and 'Friends'. The 'Featured' section shows a thumbnail for 'Friends'. At the bottom, there is a red box labeled '2.' containing an 'Add movies' button with an upload icon. A red arrow points from this button to the text 'Click this to reach the add video page'. Another red box labeled '1.' is located at the top right, containing the upload icon, with a red arrow pointing down to the text 'Click to reach add video page'.

Once the user navigates to Add video page, he/she can paste the Youtube link in the search box and Click Verify.

If the link is valid, a pop up will display the video details. Once the user clicks Proceed, the video will be added to his Studio Dashboard and user will be redirected to the Edit video page.

## 2. Edit Video

The edit video page has different tabs. Each tab enables user to add / modify different details. The tabs are as follows -

- i. Edit Details
- ii. Hotspots
- iii. Overlays
- iv. Time Triggers
- v. Publish

Each tab serves a different purpose. Follow instructions to edit the video –

### 2.1 Edit Details

The user can change the title and description of the movie. This tab enables user to add custom images to the movie.

Thumbnail Image – Upload an image to be set as the display image on OTT.

Background Image – Upload an image to be set as the background image on Film details page.

The screenshot shows the 'iFlix Studio' interface. At the top, there's a video player with the title 'Upload Images in ReactJS' and a red play button. Below the player, there are navigation tabs: 'Edit Details' (selected), 'Hotspots', 'Overlays', 'Time Triggers', and 'Publish'. The 'Edit Details' tab contains the following fields:

- \* YouTube URL:**
- \* Title:**
- \* Description:**
- Genre:**
- Thumbnail Image:**  No file chosen. A red arrow points to the text: "Choose file to set as display image on OTT".
- Background Image:**  No file chosen. A red arrow points to the text: "Choose file to set as background for film details page".

At the bottom of the form are two buttons: 'Back' and 'Save'.

The footer of the page includes social media icons (Facebook, Twitter, Instagram) and a copyright notice: "© 2021 iFlix Media. All rights reserved."

## 2.2 Hotspots

Hotspots are the interactive branches in a movie. The user should configure a hotspot wherever he wants interactivity. The names of the hotspot is displayed to the user as options of the overlay.

For instance, if the user has a video in which image uploading and image reading are two branches. Image upload branch starts at 04:36 and image read branch starts at 13:30.

In this case, the user should configure 2 hotspots with Jump point as the branch start time. The timer can be set using the slider below the player.

The screenshot shows the iFlix Studio interface for editing a video. The video title is "Upload Images in ReactJS using Cloudinary Tutorial [2020]". The "Hotspots" tab is selected, showing a configuration area with a "Name" field, a "Start Point" field, and a "Time Triggers" field. A video player preview shows a code editor with ReactJS code. Below the player, a red box highlights a blue dot on the timeline, with a red arrow pointing to it and the text "Slide the seeker to set the hotspot start time." Below this, there are "Add New" and "Save" buttons. At the bottom, a table lists the configured hotspots:

Name	Start Point	Action
Image Read	00:13:30	
Image upload	00:4:36	

## 2.3 Overlays

Overlays are the content that can appear inside the video when a viewer should interact with the movie and choose an option to move in the movie.

For instance, the user wants the viewer to choose a branch from the branches created above. The user should create an overlay with options as the branches.

The title is displayed in the pop up that appears on the movie player. The user can select left and right action hotspots from the hotspots configured in the Hotspots tab.

The jump in time will be the time at which the pop up will appear.

## 2.4 Time Triggers

Time triggers enable the users to skip a certain part of a video. A user can skip playing a part of video from the start point to the end point of the time trigger. The user can configure multiple time triggers and the “start point” and “skip to” time in each time trigger.

For instance, if viewer selects the Image upload branch from the overlay, then the Image read part should be skipped from end of the image upload (13:52) branch till the end of Image read branch (18:27).

The screenshot displays the iFlix Studio interface for editing a video. The video title is "Upload Images in ReactJS using Cloudinary Tutorial (2020)". The interface includes tabs for "Edit Details", "Hotspots", "Overlays", "Time Triggers", and "Publish". The "Time Triggers" tab is active, showing a configuration form and a table of triggers.

**Configuration Form:**

- Type:** JUMP\_POINT
- Name:** Enter hotspot name
- Start Point:** 00:00:01
- Skip To:** 00:00:01

**Triggers Table:**

Trigger Name	Start Point	Skip To	Action
Image read upload	00:13:52	00:18:27	

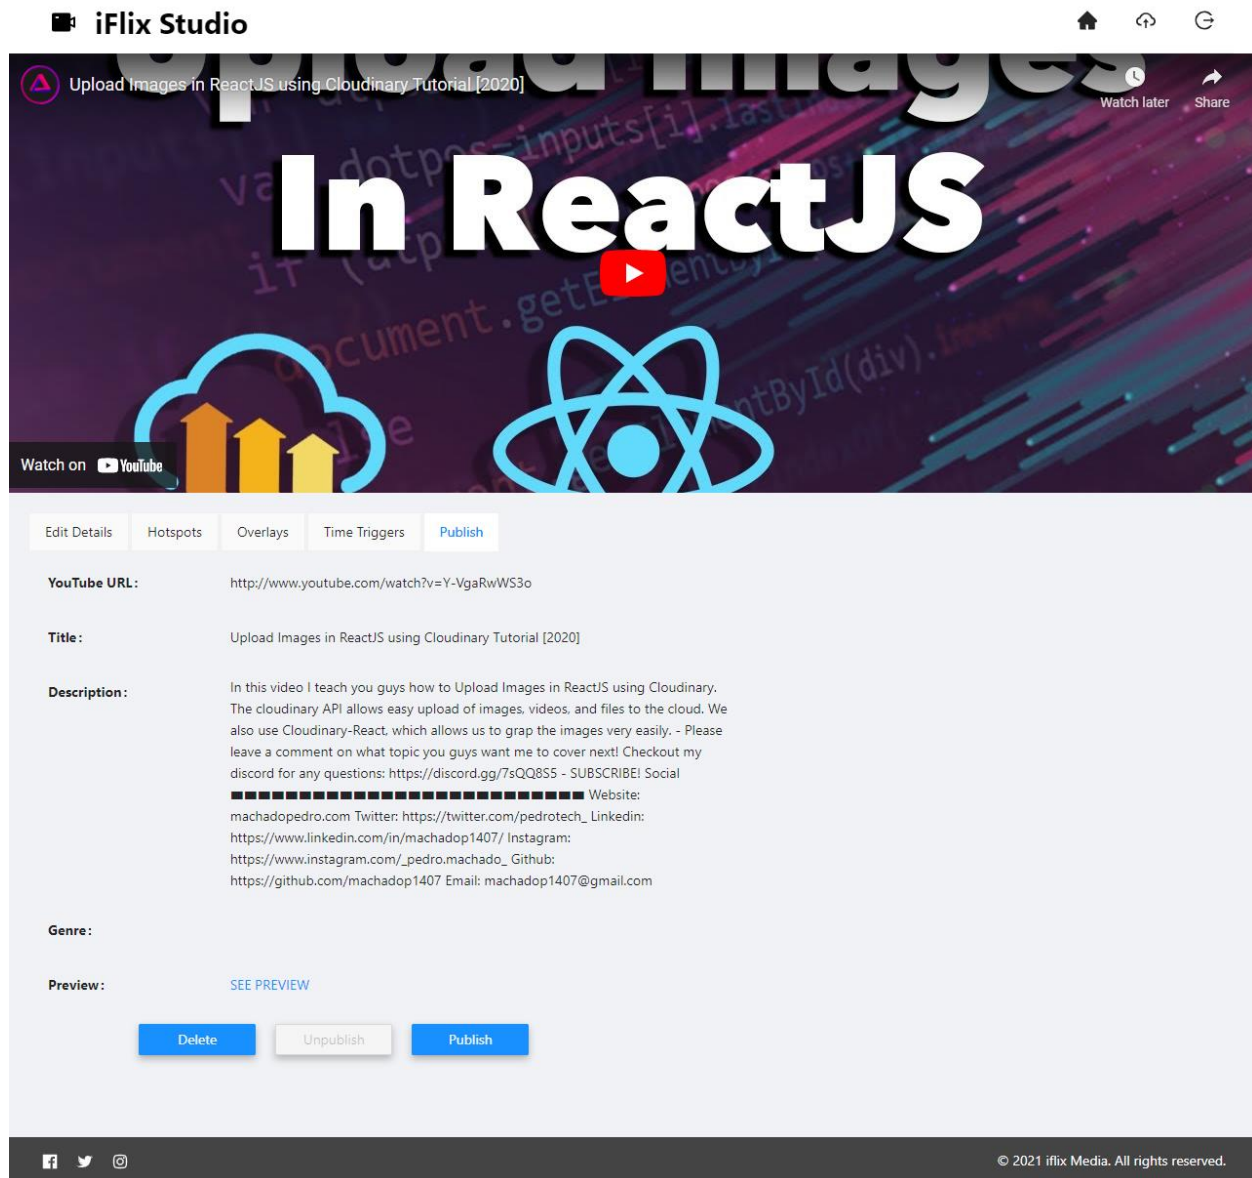

The interface also includes a video player preview showing a "More videos" section with various ReactJS tutorials. At the bottom, there are buttons for "Add New" and "Save", and a footer with social media icons and the copyright notice "© 2021 iflix Media. All rights reserved."

## 2.5 Publish

Once the user configures the hotspots, overlays and time triggers, he/she can **See Preview** and publish the video to OTT platform.

The user can also delete the video from this tab using the Delete button.

### 3. Unpublish a published video

The user can unpublish a movie to edit it from the Dashboard page. Once the user clicks on a movie in the Published section on Dashboard page, he/she will get an option on top right to Unpublish the movie.
